The officers focused on Schaumburg Road between Barrington and Martingale Roads, conducting additional patrol during the months of September and October. Their efforts were geared toward reducing injury traffic crashes. This roadway was selected based on traffic accident data and traffic analysis. Additionally, Schaumburg High School is located on this roadway and the officers focused heavily on cell phone violations. Enforcement results area as follows:

During the month of September, Tactical Unit officers affected fourteen drug related arrests, three arrests for prostitution and three warrant arrests. Additionally, the officers conducted thirty-four traffic stops, issuing seven citations, nine written warnings and fifteen compliance tickets. The officers assigned to the Tactical Unit handled sixty-one calls for service throughout the month, fifty-one of which were self-initiated activity.

Officers assigned to the Tactical Unit are actively involved in a problem oriented policing project to reduce prostitution. As a part of that effort, both patrol and tactical unit officers are each assigned to several hotels and they are responsible for walk-throughs and visits with on-duty staff. These routine checks are geared toward reducing potential criminal activity and building close working relationships with the hotels. In October 2016, hotel checks were completed seventy-eight times by officers. In May 2017, this initiative was selected as a goal for the police department. Tactical Unit and Patrol officers increased efforts, completing a total of 107 hotel checks in October 2017.

Officers determined the male was forcing the juvenile to commit acts of prostitution in another municipality. The case was turned over to that agency for investigation. In October, the male was convicted of promoting juvenile prostitution and sentenced to six years.

During the month of October Tactical Unit officers participated in a nationwide effort by the FBI, Operation Cross County. This is a yearly initiative to locate and recover juvenile human trafficking victims. The Schaumburg joint operation resulted in three prostitution arrests.

BEAT MAP

KEY PERFORMANCE INDICATORS

KPI 1: Average Response Time for Police Top Priority Calls

Responding to emergency calls for service is one of the most fundamental services a police department can provide to the residents of that municipality. Providing police service quickly when an emergency occurs is a critical measure of success. This specific performance indicator has not historically been measured in Schaumburg, therefore no benchmark exists. However, our benchmark on this indicator is to maintain current emergency response levels, or to decrease the police response time from year-to-year.

KPI 2: Community Outreach

Given significant local and national events, there is demand for open communication and transparency from the Police Department. This KPI will be part of a greater focus on community policing activities within the department in 2017. By proactively reaching out and connecting with demographic specific targets, the police department can build relationships prior to a potential critical incident involving a member of that group.

KPI 3: Traffic Crashes

Traffic safety is a relevant issue for residents and visitors alike. Unlike violent crime, which is less common in Schaumburg, several traffic crashes occur in the village every day. The latest statistics provided by the police crime analyst reveal there has been a steady increase over three years in total crashes, with 495 crashes in 2015 resulting in injuries. In order to reduce the number of traffic accidents, the village positions auxiliary officers during peak hours at locations that experience a high volume of accidents.

KPI 4: Training Received Per Patrol Officer

The department includes internal and external training events and time for each officer. The department promotes external training when available, and builds on training time by conducting additional in-shift training. Further, the department taps into the knowledge of the sergeants and identifies them as subject matter experts in one specific field, to which they can share training on this topic with their shift and perhaps the other patrol shifts as they are able. Additionally, this will enhance the skills and ability of officers and develop leadership skills in the sergeants.

KPI 5: Investigations Closed

The Police Department will look to maintain the percentage of investigations closed. We do so by a monthly supervisor review at the command level, to ensure quality. Also documentation of good and bad cases will be made public to enhance training within the unit.

KPI 6: Special Operations Hotel Program

Increase hotel building check UCR calls for service, improving year to year from 2016. The department will continue to encourage officers to spend time checking hotels and meeting hotel staff as a way to develop relationships and gain information about potential criminal activity at hotels. This will encompass a growing focus on prostitution and drug activity. Further, officers can act as village ambassadors through the increased presence at hotels, interacting with guests and visitors.
